

Accellos Company Profile

Accelerate Your Business

Accellos was founded on a simple idea: supply chain companies deserve robust technology solutions that are easy and inexpensive to implement and maintain. Accellos provides powerful supply-chain execution solutions that are easy to customize and implement, allowing our customers to enjoy **more innovation for less investment**. Our aim is to strike the perfect balance among customer satisfaction, employee fulfillment and stakeholder value.

Through a combination of strategic acquisitions, carefully-crafted partnerships and industry-leading investments in research, development and customer care, Accellos aims to become the clear choice for supply chain companies worldwide.

Accellos Leadership

Our leadership has over 60 years of experience in the supply chain software space and has run successful companies that have experienced significant growth alongside highly innovative, entrepreneurial cultures. We've aligned ourselves with some of the leading financial partners across North America and have partnered with the leading providers of Enterprise Software in the world.

Rest assured that Accellos will deliver valuable products that solve real-world problems in a cost effective manner, with the assistance of partners in your neighborhood, our solutions are built on a solid technological foundation that will ensure the longevity of your investment.
